Blink

This Product Information Guide contains safety, handling information for Blink Case.

- ▲ Read all Safety Information below and installation instructions before using Blink case to avoid damage and injury. For further detailed instructions, including any updates, visit: www.blinkcase.com

Important Safety Information

Warning: Failure to follow these safety instructions could result in damage to product or device, or injury.

Handling Blink Cover

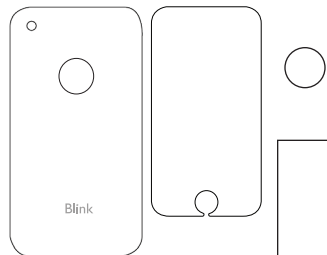

Do not crush, bend, deform, puncture, shred, microwave, incinerate, or paint on Blink case.

Aluminum Metal Parts

The cover of the case is made with aluminum metal and may cause injury or damage the device if broken by substantial impact. If the metal breaks, do not attempt to remove the broken shards without protection gloves. Metal broken due to misuse or abuse may not be returned.

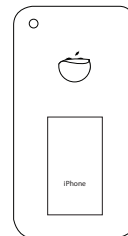

Included Within

- Blink Case
- Apple logo screen protector
- Mirror effect screen protector
- Rectangle transparent film

Notice: Before applying cover and sticker to device, wipe device with given micro fiber cloth to get rid of all debris.

- Apply small round sticker provided to the apple mark on back of the device. This sticker will protect the exposed mark from scratches. Rub well to firmly attach on device.

- Wipe with micro fiber around the apple logo below and apply transparent film provided. This will prevent any damage or complications to the logo from the adhesive on the case. **We highly recommend you to use this adhesive feature as it will prevent the case from getting detached at all circumstances.**
- Peel off cover of adhesive found inside Chroma case and firmly attach to device starting from one side to the opposite side. Be sure to apply firm pressure when attaching the case.
- Once done, wipe front screen with micro fiber and carefully apply mirror screen protector. Please keep in mind that the mirror screen protector is cut out exactly the size of the screen.
